Abstract

Same abstract as the manuscript (150–250 words).

Keywords: Smart waste monitoring, Domain generalisation, Open-vocabulary segmentation, Attribute-based zero-shot learning, Edge AI, Segment Anything

ORCID

Salvatore Capuozzo: 0000-0002-2578-9349. [Co-authors: add.]

Statements and Declarations

- **Funding:** [Funder names in full with grant numbers, or "This study received no external funding."]
- **Competing interests:** [The authors declare no competing interests relevant to this article. NOTE: two guest editors of this Topical Collection are affiliated with the University of Naples Federico II; declare the shared affiliation here and in the cover letter so the journal can assign an independent handling editor.]

- **Ethics approval and consent to participate:** Not applicable; only publicly available waste-imagery datasets were used.
- **Consent for publication:** Not applicable.
- **Data availability:** TACO, ZeroWaste-f, UAVVaste, MJU-Waste and BePLi v2 are available from their providers. Splits, atlases and configurations are released with the code.
- **Code availability:** [public repository URL]
- **Author contributions (CRediT):** [e.g. S.C.: Conceptualization, Methodology, Software, Investigation, Writing – original draft. ...: Supervision, Writing – review & editing.]
- **Use of AI tools:** [Describe any use of large language models in preparing code or text, as required by the journal's policy; copy-editing alone need not be declared.]

Acknowledgements

[Optional, brief.]
